🎓 Will to Learn

🔍 Problem Solving

📅 Punctuality

📄 Scripting

🐍 Python Programming

🔧 Network Management

💻 Software Development

SUMMARY

The links (🔗) in this resume lead to related content with trusted sources.

I am a network engineer, DevOps specialist, and programmer with 4 years of professional experience in designing, automating, and optimizing systems. My passion for development began many years ago, and I've continuously built on that foundation to expand my skills and apply them effectively in my work. I enjoy learning new technologies in my spare time and often automate repetitive tasks, which has accelerated my growth and hands-on expertise. I have contributed to several open-source projects and developed a few tools of my own.

PROFESSIONAL EXPERIENCE

Junior DevOps Engineer

@ GlobalLogic Poland sp. z o.o.

Bydgoszcz (remote)
09.2022 - ongoing

- > Automated deploying systems in multiple environments
- > Proposed software best practices
